Thanks for working on the spreadsheet. Looks good. Rich is posting this to our OSC website now.

Also - thanks for the update regarding the week 3 data. I'll try to follow-up on the last missing response.

Hopefully we'll get that info and be able to enter the remaining final qualifiers into Scribe on Monday.

Have a great weekend. Sounds like good weather. Stay away from your computers and go for a hike!

See you Monday - Kelley

Kelley,

Attached is the updated report that includes the grouping by analysis. Let me know if you have any other changes that you would like to be made.

Hi Guys -

Okay - just one more thing.....

Sorry, but I would appreciate it if you would revise the spreadsheet again. Please make it consistent with the way the individual residential reports present the data - grouped by analyses then by analyte.

I understand that you are both working in Edison this morning, If you can work this out this morning - it would be much appreciated.

Again - sorry for not being more specific when we started.

Also - looks like a bunch of responses and posting came in late yesterday from Cindy Caporale. Not sure how much time you will have to work on this today. Getting the week #3 data final is the priority. I believe most of the response to **Ex. 4 - CBI** comments deal with week #3. Getting the new data into Scribe can wait. Do what you can today and "we" can finish the rest on Monday, Also - **Ex. 4 - CBI** is off today so if you need to confirm anything with her - it will need to wait until Monday.

Please touch base with me later (before 2 pm) to let me know where things stand. Feel free to call me on my cell (267-273-8859) at any time with any questions.

Thanks for all your help - Kelley

Rich -

Here's the spreadsheet. I checked it and it looks fine to post. It is now sorted by property ID and then by analyte. However - I just noticed that the ordering of the analytes is different from the individual PDF reports. The spreadsheet lists all analytes in alphabetical order. The individual reports are actually sorted by analyses then by analyte, This groups the alcohols, bacteria data, metals data, etc.

Sandy let me know that if you would like her to resort and group by analyte she can do this tomorrow morning from Edison.

Just let me know. (FYI - the week 1 spreadsheet was only sorted by location.)

- Kelley
